

Grain: World Markets and Trade

Global Wheat Production Hits Record; Exporter Stocks Rebound

*Argentina, Australia, Canada, European Union, Kazakhstan, Russia, and Ukraine.

Global wheat production in 2013/14 is projected at a record level. Most major exporting countries have larger crops, with Canada reaching a record; Australia, the EU, Kazakhstan, Russia, and Ukraine have significantly recovered from last year. Although global import demand and consumption are currently estimated to be at record levels, most exporter stocks are forecast to rebuild. Those stocks are expected to provide a cushion to start next year's season.

On the other hand, the United States has a smaller crop (particularly Hard Red Winter) and, with stronger exports, stocks are forecast to fall. In fact, stocks are projected to be the lowest since 2007/08. Strong demand from Brazil and China for Hard Red Winter and Soft Red Winter, respectively, have led to the present relatively tight outlook for U.S. winter wheat.

The Foreign Agricultural Service (FAS) updates its production, supply and distribution database for cotton, oilseeds, and grains at 12:00 p.m. on the day the World Agricultural Supply and Demand Estimates (WASDE) report is released. It is available on the FAS website (<http://www.fas.usda.gov/psdonline/>). This circular is released at 12:15 p.m. on the same day, together with its downloadable data set.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere.

Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug).
'Marketing Year' column is germane for U.S. wheat only.

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

Global production is projected at a new record. Larger crops in China and Russia partly offset downward adjustments in Argentina and the EU. Trade is projected to reach a new record this month, mostly driven by stronger demand in Egypt, Syria and Japan. The Philippines is expected to switch to cheaper corn, slightly reducing its import demand for feed-quality wheat. U.S. exports are raised as a result of tighter supplies in Argentina and quality issues in Paraguay. The season-average farm price is reduced.

PRICES:

Domestic: Wheat prices for all classes plunged in December. Hard Red Winter dropped \$19 to \$291/ton, the lowest since June 2012. The condition of winter wheat crops in the Northern Hemisphere is satisfactory, although the recent outbreak of subzero temperatures has raised concerns over instances of winterkill in parts of Nebraska and northern Kansas. Large global supplies, particularly in Canada, are pressuring prices. Soft White Wheat (SWW) fell \$20 to \$272/ton, Soft Red Winter (SRW) slid \$9 to \$272/ton and Hard Red Spring (HRS) softened \$7 to \$318/ton.

TRADE CHANGES IN 2013/14

Selected Exporters

- **Argentina** is cut 500,000 tons to 3.0 million because of a smaller crop, and lack of Government-issued export permits to date.
- **EU** is boosted 1.0 million tons to 26.0 million due to recent large sales to North Africa (Algeria, Egypt, and Morocco) and Iran.
- **Russia** is raised 500,000 tons to 16.5 million. The export pace has been quite strong, and the upward adjustment in production is providing additional exportable supplies.
- **United States** is up 500,000 tons to 30.5 million as a smaller crop in Argentina and quality issues in Paraguay are providing opportunities for additional sales to Brazil.

Selected Importers

- **Egypt** is raised 500,000 tons to 10.5 million. The Government's purchases of just over 1 million tons in the last month have raised expectations of additional needs.

RICE: WORLD MARKETS AND TRADE

OVERVIEW

Global production for 2013/14 is projected up from last month's record, largely due to Pakistan. Both ending stocks and consumption are up as well. Already a record, 2014 trade is boosted again and expected to surpass 40 million tons for the first time.

TRADE

Global Trade Expected to Hit 40 Million Tons

Global rice trade is forecast to reach 40 million tons for the first time. Rising demand is driven mainly by China and Sub-Saharan Africa. China's imports have expanded dramatically in recent years because of relatively low Vietnamese prices. In Sub-Saharan Africa, imports are driven by rural-to-urban migration and changing consumption patterns. Consumers are switching from traditional foods (e.g., cassava and millet) to rice, which is viewed as a "fast" food because of its shorter preparation time. The expansion in these price-sensitive markets has been supplied largely by India and Vietnam.

TRADE CHANGES

Selected Exporters

- **Pakistan** is boosted 300,000 tons (to 3.3 million) in 2013 and 400,000 tons (to 3.4 million) in 2014 on the expectation that strong sales will continue.
- **Thailand** is cut 300,000 tons to 6.7 million in 2013, the lowest in more than a decade, as the sale of government stocks was slower than expected.

Selected Importers

- **Cuba** is lowered 125,000 tons (to 400,000), **Indonesia** is cut 350,000 tons (to 650,000), and **Malaysia** is down 150,000 tons (to 900,000) in 2013 on trade data.
- **Philippines** is up 200,000 tons to 1.4 million in 2014 on a recent purchase from Vietnam to replenish government buffer stocks.

COARSE GRAINS: WORLD MARKETS AND TRADE

OVERVIEW

World coarse grain production is up on a larger corn crop in China, more than offsetting lower production in the United States, Argentina, and Russia. Additionally, global barley production is up in the European Union, Argentina, and Russia. Global corn trade is down because of diminished demand from China, despite greater demand from Mexico. The U.S. corn export estimate and the season-average farm price are unchanged.

PRICES

Since the release of the December WASDE report, U.S. corn quotes have edged lower on record U.S. supplies and recent cancellations of U.S. shipments to China. Since mid-December, U.S. prices (\$205/ton) have been consistently below South American quotes and about even with Black Sea quotes.

TRADE CHANGES IN 2013/14

Selected Exporters

- **Argentine corn** is slashed 2.0 million tons to 14.0 million because of declining crop prospects and very slow shipments in recent months.
- **Brazilian corn** is up 500,000 tons to 21.0 million based on continued strong shipments.

-
- **Argentine barley** is raised 400,000 tons to 3.0 million because of greater exportable supplies.
 - **EU barley** is cut 400,000 tons to 4.1 million as export licenses taper off and new-crop Southern Hemisphere supplies enter the market.
 - **U.S. sorghum** is down 500,000 tons to 4.0 million on lower exportable supplies.
 - **Argentine sorghum** is boosted 500,000 tons to 2.0 million because of reduced competition from the United States amidst firm global demand.

Selected Importers

- **Chinese corn** is down 2.0 million tons to 5.0 million because of rejected U.S. cargoes and cancelled sales. (**Sorghum** is raised 500,000 tons to 2.5 million based on strong sales and shipments.)
- **Mexican corn** is boosted 500,000 tons to 11.0 million because of strong purchases and shipments. (**Sorghum** is cut 500,000 tons to 1.0 million because of sluggish sales and shipments.)
- **Philippines corn** is up 250,000 tons to 300,000 based on quality issues with domestic production (wet corn) and data showing trade with Thailand.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Sub-Saharan Africa: all African countries except North Africa.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2011/12 starts in 2011); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2011/12 starts in 2012). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	European Union (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
European Union (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent the European Union (Croatia plus the former EU-27) and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Office of Global Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-3448.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 12-13 December 2013. For further details on world grain production, please see World Agricultural Production Foreign Agricultural Service Circular WAP 1-14 January 2014.

This circular is available in its entirety on the Internet via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
