

Oilseeds: World Markets and Trade

Tight Vegetable Oil Market Expected in 2001/02: World Soybean Oil Stocks to Decline

USDA forecasts a tightening of the vegetable oil market in 2001/02, led by a slow-down in the rate of palm oil production and exports as well as reduced production and exports of sunflower and rapeseed oils. Palm oil production will increase a modest 4 percent in 2001/02, compared to 9 percent in 2000/2001. Because this slow-down will occur in tandem with an increase in the global demand for vegetable oil, palm oil ending stocks are forecast to decrease. Palm oil ending stocks in 2001/02 will be equivalent to 38 days of use, versus 44 days of use in 2000/01. Also as a direct result of the slowing palm oil production, the rate of increase in palm oil exports will slow from 16 percent in 2000/01 to 4 percent in 2001/02. Slowing palm oil exports, combined with rapeseed oil and sunflower oil exports that are at their lowest levels in over five years, will make room for a dramatic increase in soybean oil exports in 2001/02. Soybean oil exports are forecast to increase 9 percent in 2001/02, versus 2 percent in 2000/01, thereby increasing soybean oil's global market share from 21 percent in 2000/01 to 23 percent in 2001/02. Thus, despite record production of soybean oil in 2001/02, ending stocks will likely be at a five-year low. Tightening vegetable oil stocks in 2001/02 will boost vegetable oil prices, reversing the below-average levels that have prevailed since 1998.

Situation and Outlook

The world oilseed export forecast for 2000/01 increased nearly 1.0 million tons this month to 69.2 million tons. Soybeans, and to a lesser extent rapeseed, account for most of the increase. Argentina's 2000/01 soybean export forecast was raised 700,000 tons this month to 6.7 million tons in response to continued strong import demand by China. Canada's rapeseed export forecast is increased to a record 4.8 million tons for 2000/01 spurred by ample supplies and strong demand in China.

Forecast world oilseed exports for 2001/02 are also increased this month to 69.2 million tons. Continued growth in soybean exports, up 810,000 tons from July's forecast and 2.6 million tons from the current 2000/01 forecast, accounts for most of the increase. An increase in forecast exports from Argentina and Brazil in response to an increased soybean production forecast for 2001/02 was partially offset by a lower U.S. soybean export forecast of 27.1 million tons. The decline in U.S. exports reflects a somewhat lower 2001 soybean production forecast of 78.0 million tons as areas of hot, dry weather contribute to lower yields.

Partially offsetting the increase in forecast 2001/02 soybean exports is a decline in rapeseed exports for the coming year. Dry weather in Canada, coupled with reduced plantings this year are expected to result in a 26 percent reduction in output to 5.3 million tons compared to the 2000 crop. Rapeseed production in the EU for 2001/02 was also reduced 400,000 tons this month due principally to a decline in forecast production in France. Together, this resulted in a 445,000-ton decrease in total forecast world rapeseed exports to 7.5 million tons in 2001/02. As a result, total oilseed exports are expected to remain nearly flat in 2001/02 compared to a year earlier.

Forecast oilseed crush for both 2000/01 and 2001/02 remained nearly steady this month resulting in little change in meal and oil production. Total oilseed meal production for 2001/02 is forecast at 180.1 million tons, 6.5 million tons greater than the previous year. Forecast rapeseed meal production is reduced 400,000 tons in 2001/02 but is offset by increases in soybean, sunflowerseed, cottonseed, and fishmeal production. Total vegetable and marine oil production for 2001/02 is forecast at 90.6 million tons, up 220,000 tons from the July forecast and 2.4 million tons higher than the previous year. Lower rapeseed oil production is more than offset by increases in sunflowerseed, cottonseed, and palm kernel oil production.

World meal and oil export forecasts for 2001/02 are increased 420,000 and 320,000 tons respectively this month with increases in soybean and sunflowerseed meal and oil accounting for most of the adjustment. Forecast global consumption of meal and oil increased marginally from last month's figures.

FOREIGN AGRICULTURAL SERVICE
COTTON, OILSEEDS, TOBACCO

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North	Baltic States	FSU-12	Middle East
Algeria	Estonia	Armenia	Cyprus
Egypt	Latvia	Azerbaijan	Iran
Libya	Lithuania	Byelarus	Iraq
Morocco		Georgia	Israel
Tunisia	Europe, Eastern	Kazakhstan	Jordan
