

Oilseeds: World Markets and Trade

Global Soybean Exports Remain at Record Levels, EU and China are Major Destinations.

Global soybean exports for MY 2001/02, already forecast at record levels, are expected to remain strong despite potentially restrictive biotech regulations in China, the world's largest single-country importer of soybeans. At the end of February, the United States had already exported 2.4 million tons more soybeans than it had in the same period in MY 2000/01, with over half of this increase in exports going to the EU and China. The increase in U.S. exports to China in the first half of MY 2001/02 came as traders attempted to front-load soybean shipments into China to meet the March 20th cut-off date for China's new biotechnology regulations. Yet soybean exports to China have slowed in recent weeks as traders sort through the new regulations. As a result, China's soybean import estimate for MY 2001/02 is reduced from 13.5 million tons last month to 13.0 million tons this month, versus 13.2 million tons in MY 2000/01. However, growing soybean imports by the EU will more than offset the decrease in China's imports. Soybean imports by the EU in MY 2001/02 are estimated at 20.7 million tons, versus last month's 19.9 million ton estimate and last year's imports of 19.1 million tons. Brazil's and Argentina's soybean exports are also expected to remain strong.

Situation and Outlook

World oilseed production for 2001/02 is projected to reach a record 324.7 million tons, up 875,000 tons from previous month and 11.7 million tons from 2000/01. Brazil's soybean production forecast was increased 1.0 million tons to a record 43.5 million tons based on an increase in planted area. This more than offsets a 380,000-ton reduction in China's rapeseed production to 11.3 million tons.

World oilseed exports were increased 122,000 tons to a record 72.1 million tons. An increase in soybean exports, up 235,000 tons to 59.1 million tons more than offset lower sunflowerseed exports this month. Oilseed exports were increased for Brazil in response to the increased production forecast. Oilseed imports for 2001/02 were increased 765,000 tons with increased soybean and rapeseed imports.

The EU soybean import forecast for 2001/02 was increased 811,000 tons based on year to date trade figures. Canada's soybean import forecast was increased 100,000 tons this month to 1.0 million tons. China's soybean import forecast was reduced for the second month in a row to 13.0 million tons. Delays resulting from new import regulations led to the decline.

The world oilseed crush forecast for 2001/02 is increased 1.3 million tons this month to 266.8 million tons. Soybean crush, up 1.4 million tons to 158.5 million tons led the way, offset by lower rapeseed crush in China. Strong demand for soybean meal and oil in the United States helped boost the crush forecast 136,000 tons to a record 45.9 million tons. Crush forecasts were also increased for Brazil, the EU , and Canada based on larger soybean supplies.

World soybean ending stocks were reduced 49,000 tons this month. Forecast soybean ending stocks in the United States were reduced 128,000 tons to 7.2 million tons in response to the stronger crush. Brazil's ending stocks (Oct-Sep basis) were increased 600,000 tons to 7.9 million tons this month reflecting the higher production level. Brazil's local marketing year ending stocks, (ending Jan 2003) were increased 100,000 tons to 800,000 tons.

World protein meal production is increased 825,000 tons to 184.5 million tons. Increased soybean meal production, up 1.0 million tons to 125.7 million tons accounted for most of the increase, partially offset by reduced rapeseed meal production. Soybean meal trade was also increased this month with increased imports for the EU and the Middle East.

The March world vegetable oil production forecast for 2001/02 was raised in response to increased soybean crush. Total vegetable oil production rose 246,000 tons to 91.1 million tons with soybean oil production increasing 246,000 tons to 28.7 million tons. Forecast rapeseed oil production was reduced this month in response to reduced rapeseed output in China. Vegetable oil exports are forecast to reach 35.7 million tons in 2001/02, up 104,000 tons from the February forecast.

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North	Baltic States	FSU-12	Latin America
Algeria	Estonia	Armenia	Argentina
Egypt	Latvia	Azerbaijan	Barbados
Libya	Lithuania	Byelarus	Bolivia
Morocco		Georgia	Brazil
Tunisia	Europe, Eastern	Kazakhstan	Chile
