

Oilseeds: World Markets and Trade

Decreased U.S. Soybean Production in MY 2002/03 is Expected to Lead to Lowest U.S. Exports in Three Years

Soybeans (Million Tons)

Following three years of record soybean production in the United States, USDA forecasts MY 2002/03 soybean production to decline 1.1 million tons to 77.6 million tons. Despite the production decrease, forecast domestic crush in 2002/03 is expected to rise one percent over the current year's crush as demand for feed in the U.S. continues to grow. U.S. soybean exports for 2002/03 are forecast to be lower, down 4 percent from the current year, at 26.5 million tons. This is due to decreased U.S. production as well as increased competition from Brazil and Argentina. Record South American soybean supplies at the beginning of the MY 2002/03 will likely extend Argentine and Brazilian exports of soybeans and soybean meal well into the new marketing year thereby reducing U.S. soybean and soybean meal export prospects during the first quarter of MY 2002/03. However, the combination of lower U.S. production and increased domestic demand for soybeans are expected to compensate for the reduced exports resulting in a slightly lower forecast for MY 2002/03 ending stocks at 7.0 million tons. The initial season average soybean price for 2002/03 is forecast at \$4.45 per bushel, 20 cents higher than the 2001/02 season average price. The forecast for soybean meal and oil are similar to those of soybeans, with 2002/03 soybean meal exports forecast at 6.9 million tons, down one percent from the current year, and 2002/03 soybean oil exports forecast at 885,000 tons, down 9 percent from the current year.

Situation and Outlook

The world oilseed export forecast for 2001/02 is reduced 880,000 tons this month to 70.4 million tons. This decline is largely due to a 944,000-ton reduction in the world soybean export forecast. Most of the decline is a result of reduced trade volume with China resulting from the implementation of China's biotech regulations. China's soybean import forecast was reduced this month to 11.0 million tons, down 17 percent from 2000/01. Exports for both Argentina and Brazil were lowered this month in response to the slow start in sales in 2002. Paraguay's soybean export forecast was also reduced this month, spurred partly by a lower production estimate for 2002. Other changes this month include a 66,000-ton reduction in the world copra export forecast for 2001/02, as well as increases in sunflowerseed exports, forecast at 2.0 million tons, and rapeseed exports, forecast at 7.8 million tons. U.S. export forecasts remain nearly unchanged this month for 2001/02.

World soybean ending stocks estimates by USDA increased again this month. The ending stocks for 2001/02 are estimated at 29.5 million tons, up 14,000 tons from April. The increase in ending stocks is mainly attributed to increased stocks in Brazil and Argentina as a result of reduced exports to China. The forecast for U.S. soybean ending stocks is down 136,000 tons this month to 7.1 million tons.

The world oilseed crush forecast declined to 266.2 million tons, down 432,000 tons from last month's estimate. Leading the decline in oilseed crush is China where soybean crush for 2001/02 was reduced 500,000 tons this month to 20.6 million tons. Despite the lower crush this month for China, soybean crush in China is still expected to increase over 2000/01 by 9 percent. Estimates of Canadian rapeseed crush are down 304,000 tons due to more than a 2-million-ton drop in Canadian rapeseed production in 2001.

The total oilseed meal export forecast for 2001/02 decreased slightly this month to 58.9 million tons. Rapeseed meal exports declined over 300,000 tons, fishmeal exports were reduced 266,000 tons, and copra meal exports declined 46,000 tons this month. These decreases in exports were offset by increases in export forecasts for the remaining oilseed meals, principally soybean and cottonseed meal.

The vegetable oil production forecast for 2001/02 is increased 664,000 tons this month to 91.4 million tons. Increased palm oil production, mainly for Indonesia, accounted for most of the increase this month. Vegetable oil export forecasts are up almost 200,000 tons from last month's figure. Largely responsible for this jump is a 450,000-ton increase in palm oil exports. Palm oil export estimates are increased for both Malaysia and Indonesia and are in response to increased production and world demand.

SOURCE: APRIL 2002 U.S. BUREAU OF THE CENSUS DATA.

1 INCLUDES UNSHELLED CONVERTED TO SHELLED BASIS

2 INCLUDES SHELLED CONVERTED TO AN INSHELL BASIS

NOTE: U.S. EXPORT VALUE IS THE VALUE AT THE PORT OF EXPORTATION AND IS BASED ON THE SELLING PRICE (OR COST IF NOT SOLD), INCLUDING INLAND FREIGHT, INSURANCE, AND OTHER CHARGES TO THE PORT

U.S. IMPORT VALUE IS GENERALLY THE MARKET VALUE IN THE FOREIGN COUNTRY, AND EXCLUDES IMPORT DUTIES, OCEAN FREIGHT, AND MARINE INSURANCE.
