Oilseeds: World Markets and Trade

Projected Lower Exports of U.S. Soybean & Soy Oil in 2003/04

U.S Exports of Soybean, Soybean Meal & Soy Oil (2000/01 – 2003/04)

Despite an increase this month, U.S. soybeans exports are forecast to decline for a second year to 27.2 MnT in 2003/04. U.S. soybean meal exports are forecast just slightly above the MY 02/03 level which saw a 19 percent decline from the year earlier. Soy oil exports are forecast to drop by half to 0.5 MnT following two years of strong exports. The general decline in the exports of U.S soybeans and products can be attributed to increasing exports from Brazil and Argentina. . Exports of soybeans, soybean meal and soybean oil from Brazil and Argentina combined are forecast 53, 26 and 31 percent higher in 2003/04 compared to the 2001/02 marketing year. Tight supplies and high prices are also key factors in the drop in the U.S. soybean oil export forecast. Projections of U.S. trade share of global exports of soybeans, soybean meal and soybean oil are down from 53, 15 and 12 percent in 2001/02 to 41, 13 and 8 percent in 2003/04.

Situation and Outlook

World production of oilseeds is expected to reach 351.7 million tons in 2003/2004, 23.8 million tons higher than the record set in 2002/2003. Just under half of the increase is due to soybeans, which are up 11.2 million tons. Despite a drop in U.S. soybean production of 625 thousand tons from last month's estimate, U.S. production is expected to be 3.6 million tons higher than last year. Much of the production growth in soybeans comes from expected higher yields in the U.S. and India, as well as more planted area in South America.

World exports of oilseeds are expected to grow 3.9 percent to 74.9 million tons in 2003/2004, 2.8 million tons higher than in 2002/2003. Exports of soybeans are forecast to again dominate oilseed trade at 64.4 million tons, or 86 percent of the total, and 1.8 million tons higher than 2002/2003. U.S. exports of soybeans are projected to decline 1.1 million tons in 2003/2004 to 27.2 million tons, which is 273 thousand tons higher than July's estimate. This decline will be more than offset by an increase in exports of nearly 2.1 million tons from Brazil, 350 thousand tons from Argentina, and 230 thousand tons from Paraguay. China is expected to raise imports of soybeans 300 thousand tons to 18.5 million, while imports by the EU should increase just under 1 million tons to 18.6, replacing China as the largest soybean importer. The large EU increase in soybean imports and crush are due to weather related declines in their domestic grains production.

Rapeseed and sunflowerseed exports are expected to rise .53 million tons and .47 million tons respectively. Rapeseed exports are set to rise 12 percent due to increases in Canadian exports that will more than offset export declines in the EU and Eastern Europe due to drought. Exports of sunflowerseed are expected to rise 21 percent due to higher production in Russia and the Ukraine.

World oilmeal production is expected to rise 6 percent to nearly 200 million tons in 2003/2004. Increases are led by a 7.4 million ton rise in soybean meal, followed by increases of 1.6 million tons and 1.2 million tons in rapeseed meal and cottonseed meal respectively. Oilmeal exports are slated to rise 8 percent to just over 60 million tons. Of the total increase of 4.4 million tons, soybean increases of 3.5 million tons represent about 80 percent of the gain, and highlight the world's growing dependence on soybean meal as source of protein in feed. Growth in world soybean meal use is expected to match last year's level of 4.7 percent, with most of the increase in China, the EU and Latin America.

World vegetable oil production is expected to rise 6 percent to just over 100 million tons. This increase is led by soybean oil, palm oil, and notable increases in rapeseed oil, sunflowerseed oil, and olive oil production. This increase is just above the rise in consumption of 5 percent, and only marginally increases ending stocks to 7.3 million tons from an unusually low 6.8 million tons in 2002/2003. This will be the first time in the last 3 years that production exceeds consumption.

and SEEDS DIVISION

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and country designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North	Baltic States	FSU-12	Middle East
Algeria	Estonia	Armenia	Cyprus
Egypt	Latvia	Azerbaijan	Iran
Libya	Lithuania	Byelorussia	Iraq
Morocco		Georgia	Israel
Tunisia		Kazakhstan	Jordan
	Europe, Eastern	Kyrgyzstan	Kuwait
