

Oilseeds: World Markets and Trade

China Importing Record Levels of Soybeans

Chinese soybean imports hit a record high of 20.3 million tons in 2002/03, nearly double the 2001/02 level of 10.4 million tons. This figure is even more remarkable when compared to the 1997/98 level of 2.9 million tons. The significant increase in imports this year occurred despite actions by Chinese officials which have limited soybean imports in recent months. For the first time, Brazil's market share now rivals the U.S. share of China's soybean imports. Both the United States and Brazil are expected to post record years for exports to China in 2002/03 with U.S. exports at 7.7 million tons and Brazil at 7.4 million tons. The previous record of U.S. soybean exports to China was 5.4 million tons in 2000/01. USDA's current forecast for 2003/04 shows China importing 20.5 million tons of soybeans with the U.S. and Brazil expected to maintain similar shares of the market this year.

Situation and Outlook

Projected world oilseed production was increased by 1 million tons in October, to 346.8 million tons. Projected rapeseed and cottonseed production was increased by 1.5 and 0.4 million tons, respectively. Projected soybean production fell by 900 thousand tons, as a 4 million ton increase in Brazil was more than offset by reductions of 4.7 million tons in the United States and 400 thousand tons in China. Soybean production in Uruguay is projected to almost double to 350 thousand tons in 2003/04, an increase of 125 thousand tons from last month, as Argentine farmers set up operations in Uruguay. Favorable weather conditions drove the Indian production forecast up by 900 thousand tons, and the Canadian and EU rapeseed production forecasts rose by 150 and 400 thousand tons, respectively. Projected cottonseed production increased by approximately 200 thousand tons in both the U.S. and EU. An increase of 400 thousand tons in projected Ukrainian sunflowerseed production was almost completely offset by declines in the EU, U.S., Canada and Uruguay.

Global soybean exports are projected to reach 66.4 million tons in 2003/04, up from 64.7 million tons last month, with Brazil accounting for almost all of the increase. Chinese soybean imports are projected to reach 20.5 million tons in 2003/04, an increase of 1.5 million from last month. China's 2002/03 soybean imports are now estimated at 20.3 million tons, an increase of 827 thousand tons from last month on strong import data. Monthly Brazilian imports of soybeans have risen, leading to an increase of 400 thousand tons in projected 2003/04 imports.

Global soybean ending stocks are forecast to decline to 36 million tons in 2003/04 from 37.3 million tons last year. Brazil's end of September stocks are projected to increase slightly in spite of the short U.S. crop.

The higher projected soybean crush in Brazil and China boosted soybean meal trade and soybean oil consumption. An increase in estimated 2002/03 South American soybean oil exports reduced South American soybean oil stocks to very low levels. Projected 2003/04 Chinese soybean oil imports rose by 150 thousand tons to 1.3 million. EU palm oil imports were increased by 300 thousand tons in both 2002/03 and 2003/04, while Indian palm oil imports were cut by 125 thousand tons in 2003/04 due to increased rapeseed production.

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Asia	Africa, North	Baltic States	Latin America	FSU-12
Bangladesh	Algeria	Estonia	Argentina	Armenia
Burma	Egypt	Latvia	Barbados	Azerbaijan
China	Libya	Lithuania	Bolivia	Byelarus
Cambodia	Morocco		Brazil	Georgia
