

Oilseeds: World Markets and Trade

Record U.S. Soybean Exports Projected for 2004/05

Record U.S. soybean production, coupled with a smaller than expected South American soybean crop this spring, are projected to lead to record U.S. soybean exports of 29.4 MMT in 2004/05, up 20 percent from this year. South American soybean producers are likely to take advantage of very high soybean prices this summer by exporting a larger than normal proportion of their production. High prices will also cause a draw down in global soybean stocks, which are likely to reach very low levels before the U.S. soybean crop is harvested. Because of these factors, U.S. soybean exports are projected to be very strong this fall. South American soybean crushing and soybean meal exports will be lower than normal this fall, leading to an increase in U.S. soybean meal exports and contributing to the largest U.S. soybean crush since 2001/02. Soybean meal exports are forecast to reach 5.4 MMT, up 39 percent from 2003/04, and soybean oil exports are projected to rise 41 percent.

SUMMARY

World total oilseed production for 2003/04 was reduced 2.5 million tons to 335.8 million tons in May. Forecast global soybean production was reduced 3.4 million tons to 190.1 million tons. This is below the level reached in 2002/03 and is reflected in the current high soybean prices. Brazil's 2003/04 soybean production forecast was reduced an additional 2.5 million tons this month to 53.5 million tons. Dry growing conditions in Brazil's southern production regions continue to impact yields and reduced the year-to-year growth in soybean production to only 1.0 million tons. This is significantly below the average annual growth rate of 6.1 million tons experienced between 1999/2000 and 2002/03. Argentina's soybean production forecast was also reduced this month in response to the earlier dry conditions. Production is forecast to reach 34.0 million tons, down 1.0 million tons from the April estimate and brings forecast production below last season's record of 35.5 million tons. Bucking the trend for reduced South American production estimates this month, Uruguay's soybean production forecast was increased 170,000 tons to 520,000 tons. Higher grower returns prompted a nearly 8-fold increase in Uruguay's soybean production since 2002.

Due to lower supplies, both soybean export and crush forecasts were reduced this month. World soybean export volume is now expected to fall below the 2002/03 level, reaching 61.9 million tons or 800,000 tons below last month's forecast. Crush was also reduced 1.4 million tons in May to 171.5 million tons. This remains a healthy increase over 2002/03 and reflects increased crush in South America and China. Soybean crush in Europe declined slightly for 2003/04, while U.S. crush was unchanged in May, remaining nearly 4.0 million tons below the 2002/03 crush due to the reduced 2003 harvest. Soybean stocks will also be lower in 2003/04 due to the decline in soybean production. Stocks are forecast to reach 31.7 million tons this year, down 1.3 million tons from the April forecast.

Partially offsetting declines in soybean production in May were increases in rapeseed and cottonseed production forecasts. India's rapeseed and cottonseed production forecasts were raised this month. Rapeseed production was also increased for the EU but in this case reflects the move to an EU-25 accounting and the inclusion of additional production data for some of the acceding member states that was previously unreported.

The global meal production forecast for May was reduced 543,000 tons to 196.9 million tons. Soybean meal production was lowered nearly 1.2 million tons due to the reduced South American soybean supply situation. Increased rapeseed meal and cottonseed meal production in India and elsewhere, along with an increase in sunflowerseed meal production helped offset some of the decline in meal production. The global vegetable oil production forecast declined 93,000 tons in May as lower soybean oil production was mostly offset by increased rapeseed oil production. Forecast vegetable oil exports are reduced 725,000 ton in response to lower palm oil and soybean oil trade.

U.S. oilseed production for 2004/05 is forecast at 90.2 million tons, up 19 percent from 2003/04. Soybean production will account for most of the increase, rising 23 percent to a record 80.7 million tons. Other U.S. oilseed production is expected to decline marginally in 2004/05 based on farmer planting intentions and trend yields.

U.S. soybean exports are projected to reach a record 29.4 million tons in 2004/05. The short South American crop in 2004 will result in reduced competition from Argentina and Brazil this fall that will help boost the pace of U.S. exports. Soybean crush in the U.S. is expected to rebound to 45.3 million tons in 2004/05. This would place crush at the second highest level on record, and reflects the expected improved supply situation and lower prices. Exports of soybean meal and oil are also forecast to rebound from depressed 2003/04 levels but will remain below average. Domestic disappearance of both soybean meal and oil are forecast to recover in 2004/05 and reach near historic highs.

Notes on World Supply/Demand Tables

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Asia	Africa, North	FSU-12	Latin America	Europe (EU)*
Bangladesh	Algeria	Armenia	Argentina	Austria
Burma	Egypt	Azerbaijan	Barbados	Belgium
