U.S. Export Prospects Brighten on Tightening Soybean Supplies in South America

Prospects for U.S. soybean exports have brightened considerably since January as strong global demand, accompanied by shortfalls in projected South American production, is expected to boost both the quantity and value of U.S. exports. The 2015/16 U.S. export forecast is raised nearly 1.0 million tons this month, on top of last month's 500,000-ton-rise, and currently stands at 48.9 million. In addition, the export forecast for 2016/17 is raised to a record 52.3 million, 4 percent above the previous record set in 2014/15. The higher U.S. export forecast follows a relatively disappointing period in the export season where abundant South American supplies and a strong dollar led buyers away from the United States. Additionally, global soybean prices fell below \$9.0 a bushel as stocks continued to build in the United States.

While stocks were growing in the United States, strong export demand and a rebound in Argentina crush have helped drive South American supplies lower. Weather issues have contributed to the current lower supply situation as dry conditions cut yields in parts of Brazil and flooding rains led to production and quality losses in Argentina. Accordingly, South American supplies in May are estimated to be 15.0 million tons below year-ago levels, prompting the significant price rises observed since early March and a forecast of slowing South American exports in the third quarter of 2016. In addition, a strengthening in both the Real and Peso since January has improved the competitiveness of U.S. soybeans.

The result has been a growing interest in purchasing U.S. soybeans as illustrated by the larger sales volumes reported in recent weeks. This is expected to carry over into 2016/17, propelling exports higher and lowering U.S. ending stocks. With prices expected to remain above those observed in 2015, producer returns are expected to improve.

OVERVIEW

2016/17

Global oilseed production is forecast higher this month. Larger soybean crop projections for the United States and Canada more than offset a reduction for Ukraine. A reduced rapeseed production forecast in the European Union is more than offset by gains in Canada and Russia. Global sunflowerseed production is raised this month on larger projections for the European Union and Moldova. The peanut production forecast is raised on gains in the United States and Brazil. Global cottonseed production is reduced as lower crop projections for India, Pakistan, and the European Union more than offset gains in Australia and the United States.

Soybean imports are largely unchanged this month. Exports are projected to grow in line with larger exportable supplies in the United States and Canada more than offsetting reduced shipments from Ukraine. Global stocks are raised this month. The U.S. season-average farm price is unchanged at \$9.50 per bushel.

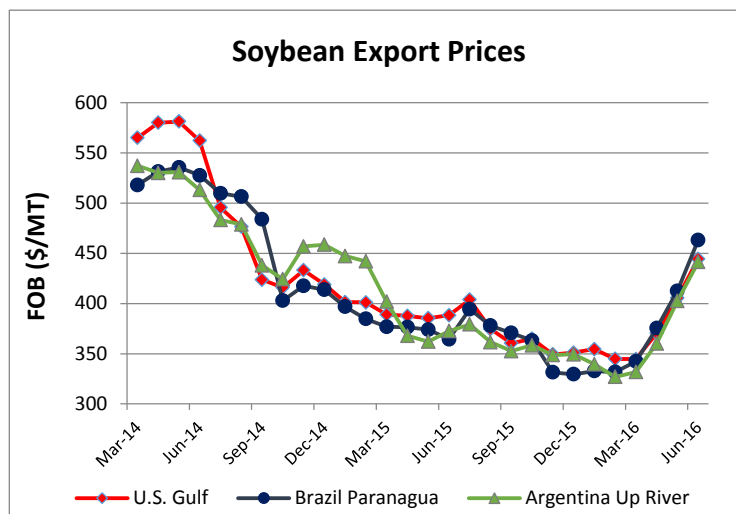

2015/16

Global soybean production is reduced this month on lower harvest estimates for Brazil and India. Imports are reduced on a weaker pace of trade in Egypt, Vietnam, and the United States. Exports are lower on reduced shipments from Brazil that more than offset gains in the United States. Global stocks are reduced this month. The U.S. season-average farm price is unchanged at \$9.05 per bushel.

SOYBEAN PRICES

U.S. export bids in June, FOB Gulf, averaged \$444/ton, up \$39 from last month, and the highest level in nearly 2 years.

As of the week ending June 30, U.S. 2015/16 soybean export commitments (outstanding sales plus accumulated exports) to China totaled 27.5 million tons compared with 29.9 million a year ago. Total commitments to the world are 51.3 million tons, compared with 50.5 million for the same period last year.
